### **Interlight International, Inc., A Name Change for a Growing Company**

Interlight International, Inc., Tallahassee, FL, USA, is proud to announce their new name. As a result of the enthusiastic response of the European and Asian markets to CD-I and the increased percentage of current projects for foreign clients, Interlight has changed its name from Interlight Productions, Inc. to Interlight International, Inc. The company's work abroad, which includes Europe and the Far East, testifies that Interlight is working toward, and achieving, world-wide recognition as a forerunner in the CD-I industry.

To help support Interlight's international business, representatives have been added in France and Korea. With these new additions, Interlight is better equipped to provide quality CD-I to the international community. Interlight will continue to maintain the quality of - and expand the volume of - domestic operations.
