

**Dear BellSouth Optical Forum Attendee:**

Thank you for participating in today's Optical Seminar. We hope you found the session informative. Our goal is to provide you valuable information about new communications tools and developments that benefit your business. Helping you find the right answers to your data transport challenges is our focus.

Analysts have identified Metro Ethernet services, delivered over native LAN Gigabit Ethernet (GigE) connections, as the one sustained growth area in this tough economy. Understanding its applications and underlying benefits is fundamental to why so many other businesses entrust GigE as their data solution.

**>> Thank you**

Your feedback on today's session is greatly appreciated. As a thank you, we would like you to have a little fun. Please accept this golf ball retriever as a gift for graciously giving us your time and input. We hope you will enjoy lunch on us and visit our partners' information tables.

If you need more information on this or any of the services discussed today, please contact your BellSouth representative or visit us at:
